Understanding Your Bill

Applicable Riders: Charges applied to certain rate schedules to recover various costs associated with Dominion Energy's electric operations and production.

Demand Charge (kW) : Largest electrical use or highest "demand" for electricity averaged in any 30-minute period per month measured in kilowatts (kW). Charge is calculated based on cost per kW used.

Distribution Service: Charges for the use of local wires, transformers, substations, and other equipment used to deliver electricity to your home or business. This service must be purchased from Dominion Energy Virginia.

Electric Supply Service (ESS): Charges for the generation and transmission of electricity, including fuel. This service may be purchased from a licensed competitive service provider.

- **Generation:** Charges for the production of electricity from Dominion Energy's power plants.
- **Transmission:** Charges for moving electricity from Dominion Energy's power plants to substations.
- **Fuel:** Charges associated with the cost for fuel used to produce electricity, including transportation.

kWh (kilowatt hour): A measurement of electrical energy.

Late Payment Charge: Fee assessed on any unpaid Dominion Energy Virginia charges past due at the time of billing.

Multiplier: Some meters are programmed to record energy at a slower rate due to the demand needed. Once the readings are obtained, the usage is increased by the programmed rate (multiplier).

Rate Schedule: Price used to calculate your bill. View our rate schedules at DominionEnergy.com, search: Rates.

Re-Regulation/Energy Choice

Competitive Service Provider (CSP) or Supplier: A person or company who is licensed by the State Corporation Commission to sell competitive energy services such as ESS.
