COLORADO'S DIVERSE ENERGY MIX

Because clean energy matters to our customers, we use a diverse mix of sources to produce the reliable, affordable electricity you need. Today, Xcel Energy serves Colorado customers with electricity that is more than 31% carbon-free, putting us well on the way to our Colorado Energy Plan goal of 55% renewable sources in Colorado by 2026.

Working together, we are confident we can achieve our industry-leading corporate vision to serve customers with 100% carbon-free electricity by 2050. Between 2005 and 2019, we have lowered carbon emissions 42% in Colorado. You can help us reach our goals, while using less energy and saving money. Some ideas:

- Opt for renewable choices, including Windsource® and solar programs
- Drive electric for big savings over the life of your vehicle
- Explore rebates and money-saving products for home and business
- Choose smart devices for greater control of your energy use

Xcel Energy's clean energy vision is bolder than ever. Ready to learn more? Go to [xcelenergy.com](https://www.xcelenergy.com) to explore all your options.

Power delivery: Includes specific labor associated with transmission and distribution facilities, metering, billing, customer service, allocated overheads, taxes and a profit component.

Power supply: Costs include all purchased power and energy source costs. For generation plants owned by Xcel Energy, power supply costs also include labor at generation plants, depreciation of generation plants, allocated overhead, taxes and a profit component.

Price components: Percentage components for an average monthly electric bill:

Example: If your residential bill for this month is \$67.10, then about 63% (or \$42.34 of your bill) is for the electricity itself, and about 37% (or \$24.76) covers the cost of having the electricity delivered to your home.

Note: Price component information applies to the average customer and may differ when applied to individual customers. Additional information is available upon request.

Power supply mix: Our Colorado energy mix includes coal, natural gas, wind, solar and hydroelectric power. Energy sources used in power generation and purchase for all energy customers in the 2019 calendar year:

2019 Energy Mix, Colorado

Visit [xcelenergy.com](https://www.xcelenergy.com) for more information about the resources that produce your electricity, including the average cost of each resource.

*Includes wind and solar energy generated through Xcel Energy's renewable energy programs: Windsource, Renewable*Connect, Solar*Rewards Community and Solar*Rewards.

**Includes purchased biomass, oil and nuclear power.
