save energy and money all summer.

Now that warm weather is here, your home may be using more energy to keep you comfortable—and your energy bill may show it. What can you do now to reduce your energy costs? Using the energy tips below could pay off.

- MAINTAIN YOUR A/C SYSTEM**

Most of your warm weather energy expenses are directly related to cooling your home. Schedule regular maintenance to keep your system running at peak efficiency.

- USE MYACCOUNT ONLINE TOOLS**

Your BGE online account provides the tools you need to track your energy usage in near-real time. Compare energy usage trends, measure results of energy-saving practices, and set alerts to let you know when energy usage is trending high.

- REDUCE HOT WATER USAGE**

Water heating accounts for about 18% of home energy consumption. Reduce hot water usage by installing faucet aerators and efficient flow showerheads and adjusting your hot water heater to 120°F, or the low setting.

- USE A PROGRAMMABLE THERMOSTAT**

Save about \$180 per year in energy costs by using a programmable thermostat to automatically adjust your temperature settings. Take advantage of savings when you're sleeping or not at home.

Visit BGE.COM/Save for more energy and money-saving tips.

Savings stack up!

When you sign up for PeakRewardsSM, you earn up to \$25 in monthly bill credits all summer—that's up to \$100 a year! Plus you'll get up to a \$100 bonus your first year for participating. Visit BGESAVINGS.COM/Programs/AC to learn more about the program.

Here's a quick way to save

Want a quick and easy way to boost your home's energy efficiency and start saving money?

Schedule a Quick Home Energy Check-up. In about an hour, a trained

Check-up professional will walk through your home, identify ways to reduce energy use and save money—plus install up to 15-energy-saving items like LEDs—at no additional cost. You could even get a smart thermostat installed! Schedule your Check-up at BGESmartEnergy.com/SENQHEC today!

Language preference

BGE is currently evaluating the need for offering account communications in languages other than English.

Log onto your BGE online account at **BGE.COM/MyAccount** and visit the My Notifications Preferences page under My Profile, to select the language you would prefer from the dropdown menu under the Language category. Your language preference will help us plan for how we can better serve you in the future.

Nautical knowledge

National Safe Boating Week is scheduled each year as the first full week before Memorial Day weekend. Please remain safe this season with these helpful power line safety tips for boaters:

- Be sure to avoid power lines when you are towing or storing your boat.
- Before your trip, make sure you know exactly how much overhead space your boat requires.
- Look up before you launch and use a spotter to make sure your boat clears any obstacles, including overhead power lines. Even on land, your boat can get caught in overhead power lines.
- Check the clearances listed on nautical charts as you approach any overhead power lines. Don't forget to add the extended height of any mast-mounted equipment or antennas.
- Check the clearances before you raise or lower your mast.
- Approach all overhead power lines with caution, and make sure flags and antennas are folded down.
- Look for warning signs that indicate underwater electrical cables and never anchor your boat near them.

National Volunteer Month

Through the employee volunteer network "Energy for the Community" BGE employees lend their time and talent to nonprofit organizations that support community development, education, the environment and celebrate arts and culture. In support of National Volunteer Month, BGE organized more than 250 community service projects for the company's 3,200 employees, family members and friends to participate in throughout April.
